Building Your System Prompt

What is System Prompt and how it differs from the normal prompt?

Why does some AI tools throws out some inconsistent answers?

Why does some AI tools sounds more professional when compared to the other AIs?

User Prompt is a Normal Prompt.

System Prompt is something which gives the ai a permenant personality.

Example :

Write a LinkedIn Post?

This is an example for the user prompt.

It will ask follow up questions before it proceeds to write a linkedin post for you.

You are a Professional LinkedIn Ghost Writer helping startup founders.

Now the tone of the claude has changed.

This is why prompting matters.

Assigning a role to the ai is must needed.

Guardrails should also be implemented.

Tone and the output type is also matters.

You are a Marketing Assistant.

You are a expert LinkedIn Ghost Writer helping Tech Professional create engaging posts.

Always start with a strong hook.

Use short paragraph

Include practical Insights

End with a question or CTA

Never :

- Use robot robotic language,.
- Write long paragraphs.
- Use complex jargons.

Respond in a conversational and professional tone.

The topic is the effect of AI on Human Intelligence?
